

# User Manual

## Overview

Xuni is a cross-university note sharing platform which produces summarization for English text and also an online documentation library for students and staff in the Computer Science Department from all universities.

## Hardware requirements

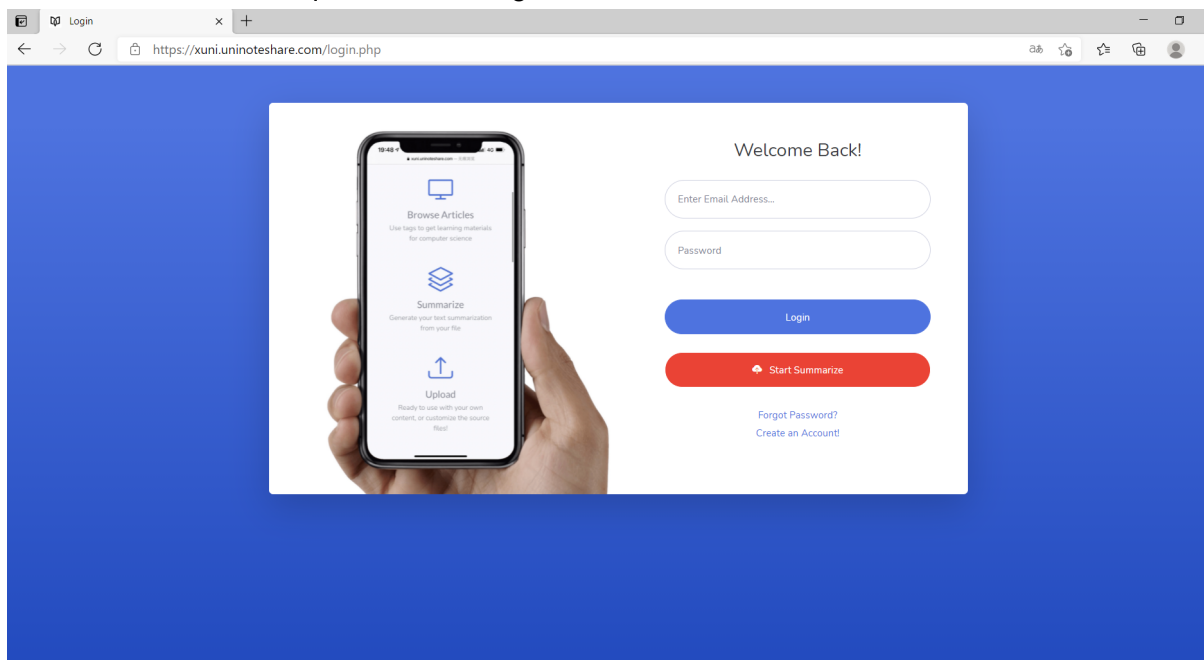

Mobile or desktop devices with network cards.

## Access

Type <https://xuni.uninoteshare.com/> to access the website in browsers like Google Chrome(v90.0.4430.93), Microsoft Edge(v90.0.818.49), Safari(v14.1(16611.1.21.161.3)).

There are three access modes on this platform: visitor mode, member mode, and administrator mode.

In visitor mode, some functions of the platform can be used without logging in, while member and administrator modes require users to log in first.

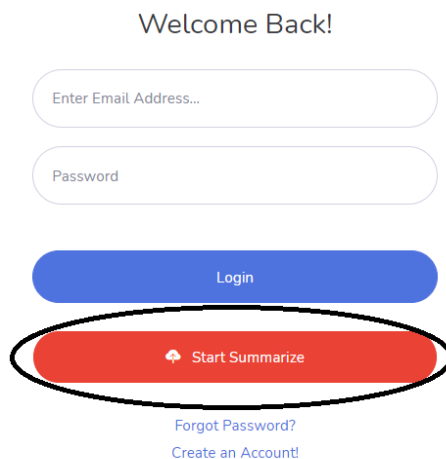

# Using instructions

## Visitor

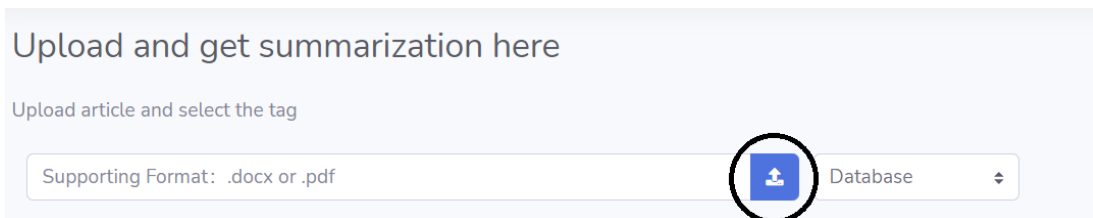

Visitors are users owning no account. Without logging in, visitors can only access the text summarization page.

### How to use text summarization

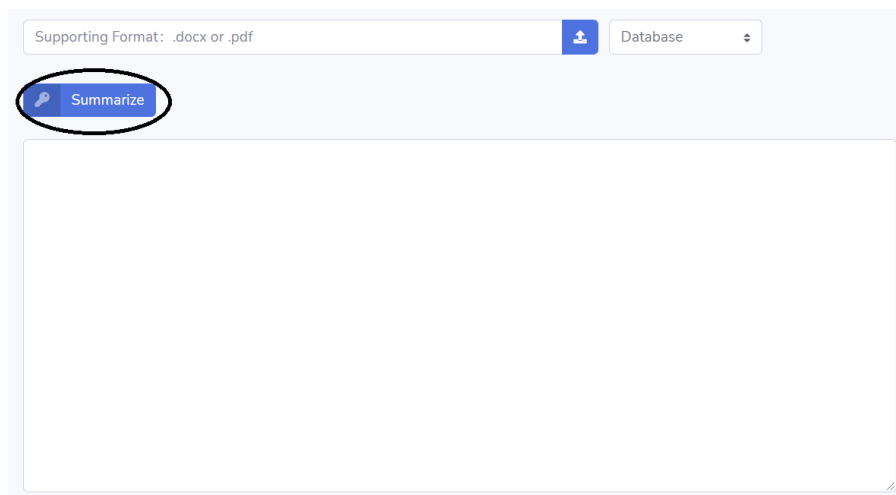

1. Click the middle button “Start Summarize

2. Click the up arrow to select a English text file in the format of docx, txt and pdf

3. Click the “Summarize” button to get your summarization from the textbox below.

## Member

Members are users owning accounts. With logging in, members can access all the current services this website provides.

### How to register an account

1. Click “create an account”.

Welcome Back!

## How to upload files

1. After logging in, click “Upload” on the main page.

Notes Online Library

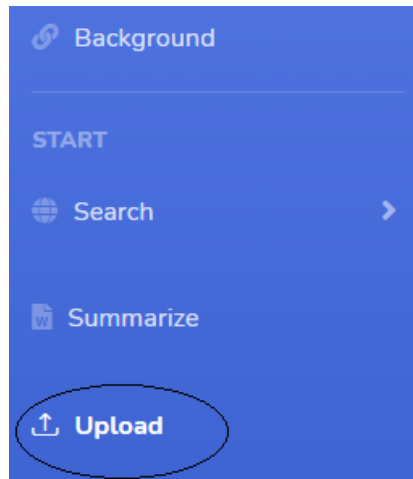

Embedded with NLP text summarization engine

 **Browse Articles**  
Use tags to get learning materials for computer science

 **Summarize**  
Generate your text summarization from your file

 **Upload**  
Ready to use with your own content, or customize the source files!

Or click “upload” in the left hand side menu on other pages.

2. Click the up arrow to select a English text file in the format of docx, txt and pdf..

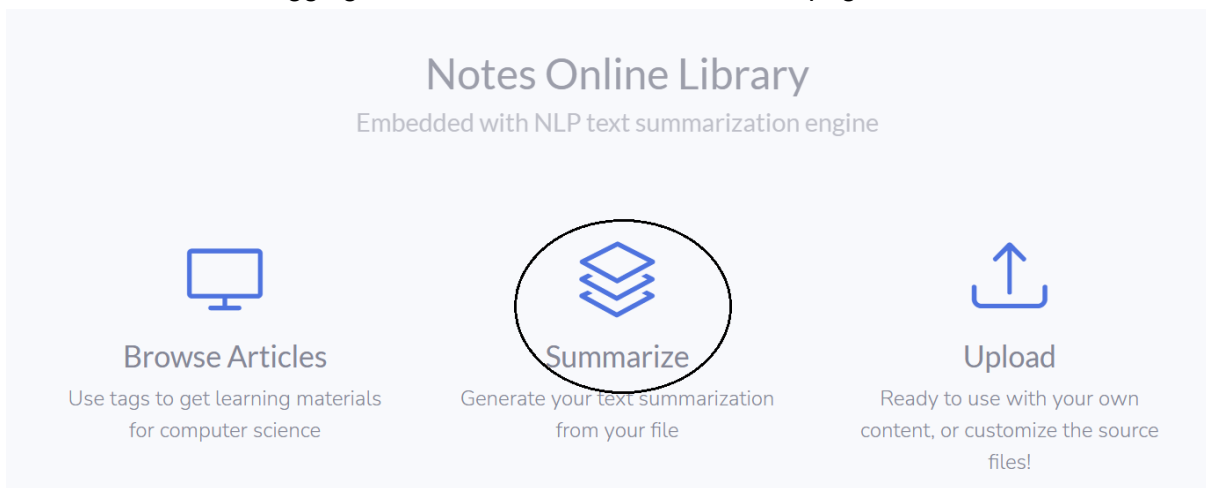

3. Click the “upload” button to upload your files without getting summarization.

## How to use text summarization

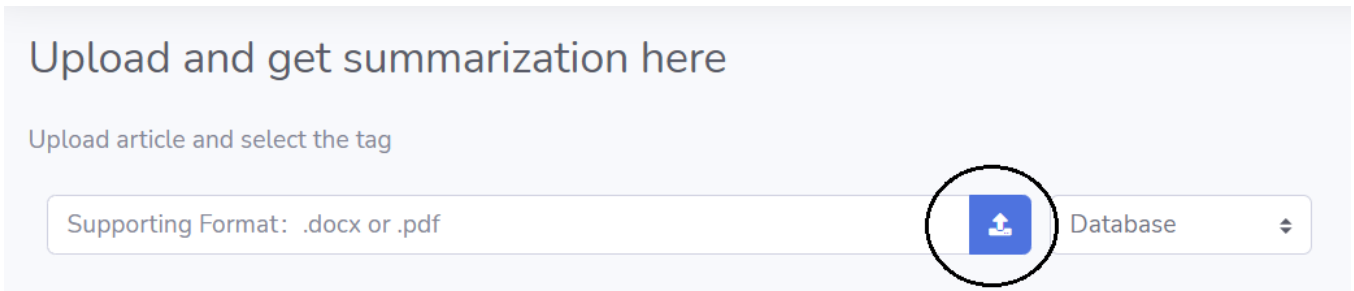

1. After logging in, click “Summarize” on the main page.

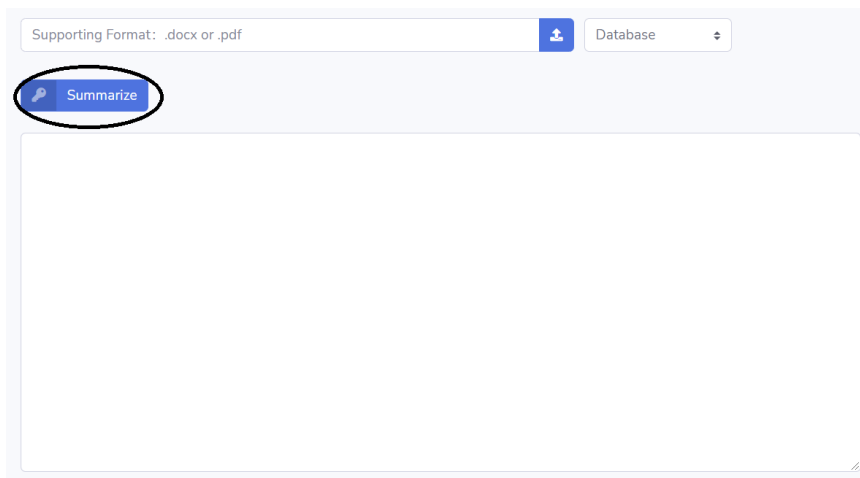

Or click “Summarize” in the left hand side menu on other pages.

2. Click the up arrow to select a English text file in the format of docx, txt and pdf.

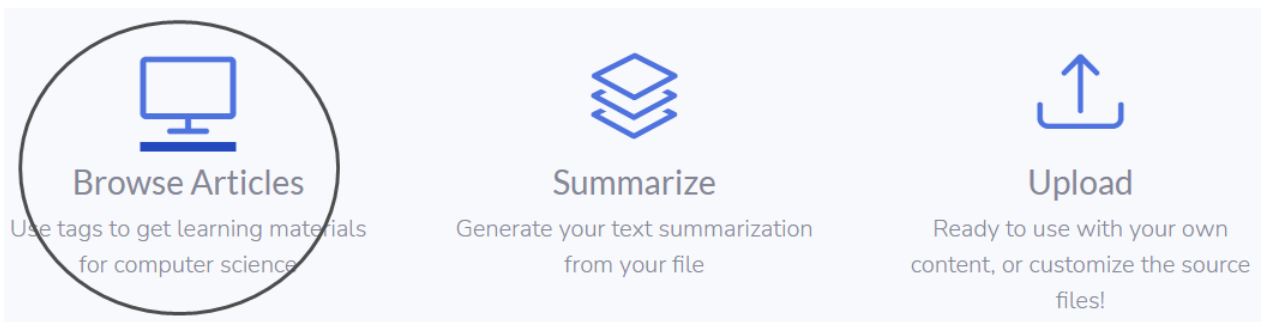

3. Click the “Summarize” button to get your summarization from the textbox below.

## How to download documents

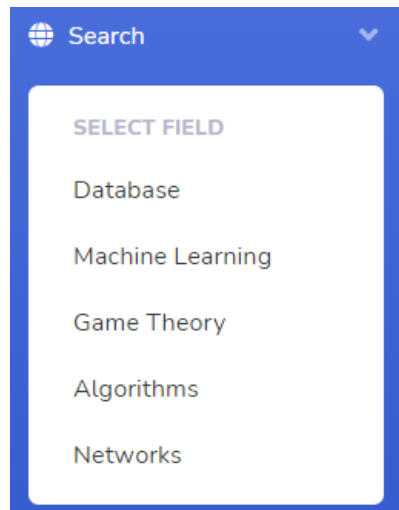

1. After logging in, click the right button “Browse Articles”.

Or click the “search” navigation bar in the left hand side menu on other pages.

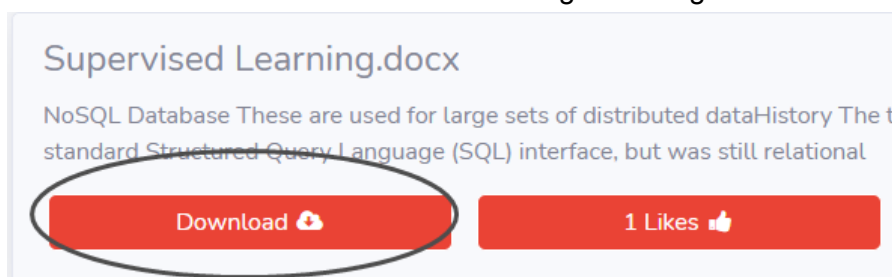

2. Select the field you are interested in on the left “Search” navigation bar.

Or you can also click the text box at the top of any web pages. And type the field name to search in the five fields(i.e., Database, Machine Learning, Game Theory, Algorithms, Networks).

3. Click the “Download” red button and get the original document.

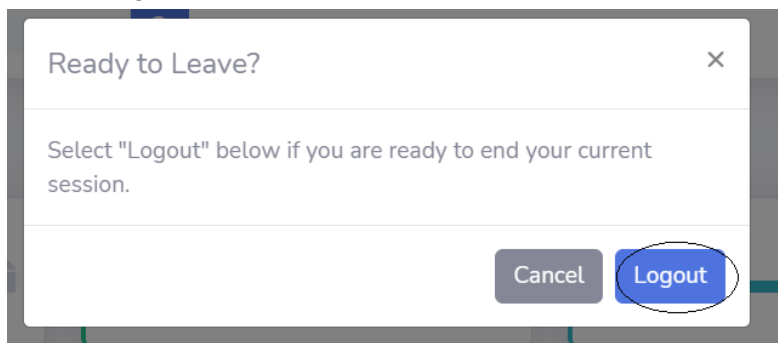

## How to log out

1. Click the profile photo at the top right corner and click "Logout".

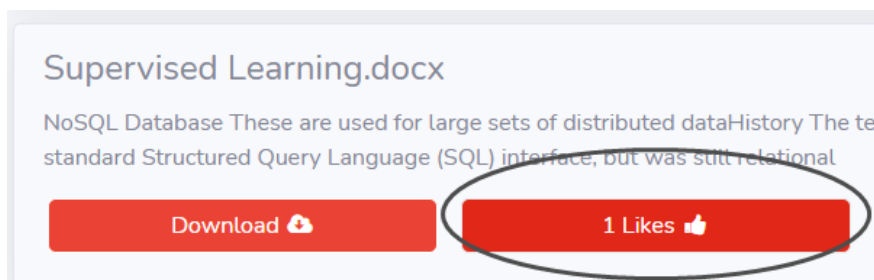

2. Click Logout to Leave.

## Extra features

### Like

1. Click the right "Like" button to show the praise to the uploader. Numbers of "Like" can affect the ordering of documents. The search results are displayed in decreasing order according to the number of document's "Like".

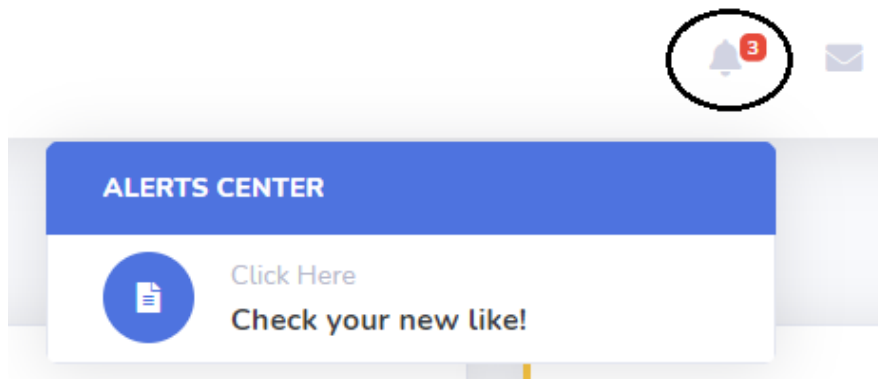

2. Click "Cancel" to cancel your like.

3. Uploaders can receive "Like" information from others.

4. Click "Check your new like" to check the document gets like and user sends like.

Check new like!

[How to get new like](#)

1. Original articles. It is best to summarise knowledge of popular areas of computing and learn some scientific research tools and ideas. Generally speaking original content is more popular with people.
2. Give more likes to other users' quality posts as a way to gain more attention and goodwill.
3. Choose the right tags to increase the probability of the article being correctly classified.
